

According to the Egyptian Religion , **Isis**, the Egyptian Goddess, reassembled the body of her husband, **Osiris**, after it had been torn into fourteen parts and scattered throughout the regions of Egypt.

She gave **Osiris** immortality by anointing his body with **precious oils** . This was the origination of the Egyptian rites of Embalming.

The Egyptians had an extensive knowledge of the properties of aromatic gums and resinous substances. They played an important part in their lives.

The women bathed in perfumed water and the men used the scented unguents for their bodies.

During festivals, incense was burnt in the streets, so that even the poorest participated and enjoyed healthy and uplifting perfumed air.

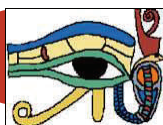

We at **UTTATI** are bringing to our esteemed clients some of the great formulas of time tested and long historical record. By using state of the art scientific knowledge and formulation expertise we are blending History with Modern Science. Presently so many research centers are validating the work and the great healing and supporting effects of natural essential oils.

Our Blends use only the purest first press highest quality essential oils , imported from Egypt and more than 25 other countries known for a long history and for being esteemed as the best source for the ingredients of our Egyptian Aromatherapy Blends .

WATISUC: Helps boost the pancreas and balance blood sugar and reduce the craving for sugar. Must be used daily. May be used as a foot massage before going to bed. Diabetics should consult their physician before using this Blend and should monitor their blood sugar levels. (Essential Oils include Eucalyptus, Garlic, Geranium.)

EGYPTIAN AROMATHERAPY

The Egyptian Priests, more than 4000 years ago, managed to prepare “Sacred Perfumes” of which the Glorious “KYPHI” was the most renowned.

Kyphi was not only a perfume but also a powerful arsenal of healthy substances that are the building blocks of health support. This has led the Greeks to engage in great trades with Egypt buying large amounts of Kyphi .

These concoctions were prepared as a Religious Ritual. They were manufactured as solid incense, or fat cones or liquid oils for different ways of application.

They were burned in the Temples of Egypt as a fragrant offering to the Gods.

Their pleasures were enjoyed by the Royalty and Nobility and, to some extent, the public.

According to Greek historians, (Herodotus, Pliny, Democritus...) the Egyptians were using their secret herbal fragrant smoke to induce sleep, allay anxieties and brighten the dreams of the house dwellers.

Our list of Aromatherapy Blends is so extensive to cover a large number of issues that face men and women in all age groups and all walks of life.

Our Blends communicate with one’s innermost self and help improve the lifestyle and the general condition of the user - physically, mentally, emotionally, and spiritually.
